SLS - Operational support at Office & Warehouse

- **SLS provides round the clock door to door services across North India, having its own offices/warehouse in almost every state.**
- **SLS** is having exiting warehouse of approx 25000 sqft. In Rudrapur, approx 20000 sqft at Haridwar, approx 5000-7000 sqft each at Delhi, Ghaziabad, Manesar etc.
- SLS is having its Head office at Delhi which constitutes all the necessary departments for the support functioning. The staff are recruited to handle Accounts, Customer query, Customer communication, MIS management etc.
- **SLS** has trained staff and management at all the offices & Warehouses. Proper hierarchy is being employed for smooth working, Branch manager is being reported by Operation Manager(s), Supervisors and clerical staff so on.
- **SLS has appointed in-house trained labor at all the warehouses for better material handling and safety of goods and ensures round the clock services.**
- The warehouse area is totally marked for easy accessibility of the goods and distinguish.
- The warehouse is having docks for proper loading and unloading of goods. This makes handling of goods easy and fast.
- The warehouse is guarded for safety of material.
- Pallets are being used for the stacking of material and hand pallet machines are used for material movement.

SLS - Standard Operational Procedure (SOP)

- Booking information of Consignment is received through Mail or sms/whatsapp or phone by the concern Branch operation manager.
- The vehicle for local pick up is being arranged as per discussions. All the vehicles used are **closed body** containers.
- The loading is being done at consignor end, with proper stacking in presence of the driver/local representative. The vehicle is routed to the booking office.
- The vehicle is then routed to HUB, from there the material is being distributed to spokes.
- The HUB are designed with the dock and all the vehicles are being unloaded from dock.
- The material is stacked on the plastic pallets, whose carrying capacity is 1 ton. The pallets are loaded with max weight of approx 500 kgs.
- The pallets are stacked in the warehouse according to part number/LR wise.

SLS - SOP (Contd.)

- The picture below depicts the actual stacking and fleet of SLS.
- SLS is having in-house team to manage the warehouse, including supervisor (who are at dock for loading/unloading), Operation manager, Branch Managers. We also have in-house labour, which ensure round the clock service and better control on material handling.
- The Route vehicle carries the material to the destination city (HUB). The route vehicles used are also Closed Body container, and are sealed once departed from source HUB.
- The destination HUB is also equipped with same as mentioned above features.
- The material will be unloaded and kept at the place dedicated for particular customer.
- The delivery team will call the consignee and ask for delivery time. The delivery is being sent through the local fleet.
- The POD is being handed over to the local office, which scans and send it to the HO at Delhi.
- The delivery MIS is being sent to customer on daily basis and same cycle is being repeated.
- The staff is minimum graduates and knows the working of computer.
